

MagiCAD Maintenance keeps you covered

With the MagiCAD Maintenance plan you will receive all MagiCAD updates automatically as soon as they are released, making Maintenance the most cost-effective way of managing and updating licenses and software versions within an organisation. Once new updates are available, the customer can choose which updates to install and when to do so.

Maintenance costs significantly less than ordering the same upgrades individually, and it also makes budgeting easier as the costs are fixed for the duration of the agreement.

10 reasons to invest in MagiCAD Maintenance

1. Immediate access to the latest design features

Our product developers are working for you every day to make sure that the software you use is always up-to-date. Every six months we release a new MagiCAD version for our customers, packed with new features, improvements, and intelligent, time-saving functionalities.

2. Previous Version Support Policy

Our Previous Version Support Policy covers support for previous versions until you have a chance to catch up with the current version. Our technical experts guide you through the license management process according to your needs.

3. Dedicated team of experts at your service

We have more than 30 years of industry experience. Our dedicated technical specialists with strong experience and backgrounds in MEP engineering and construction are available for you to ensure that your software deploys smoothly and runs efficiently.

4. Freedom to select the version you use

Sometimes the project group may stipulate the use of older software versions in a project. To facilitate these needs, we provide our users with the opportunity to also download and install older MagiCAD versions from our online Product Centre.

5. Market-leading companies choose the MagiCAD Maintenance plan

In over 56 countries worldwide, market-leading engineering consultancies and contractors rely on MagiCAD subscription to keep them at the forefront of MEP design.

6. Flexible upgrades depending on your needs

As a customer with a Maintenance plan, you are the first to be informed when new versions are available. You can upgrade immediately or later according to your own schedule.

7. Budgeting is easy

The Maintenance plan makes long-term budgeting easier because it enables costs to be fixed for the duration of the agreement. Maintenance is the most cost-effective method of keeping your MagiCAD tools up-to-date with the latest market-leading design technology.

8. Reduces the cost of staying up-to-date

The Maintenance plan is always more cost-efficient than purchasing separate upgrades. Maintenance agreements can be made for one, two, or three years at a time. With multi-year contracts, the customer receives an additional discount and can always be certain that the latest tools and updates are at their disposal.

9. Product News Notifications inform you about updates

New product versions are available from our online Product Center. Automatic "Product News Notifications" let you know when new manufacturer databases are available, enabling you to take advantage of each new update immediately.

10. 99% of our customers renew their Maintenance plan

Maintenance lets you focus on running your business and producing excellent MEP design. Maintenance saves money, reduces the amount of man-hours required for systems administration, and ensures that you can always rely on your tools being up-to-date. This is why 99% of our customers renew their Maintenance contract year after year.

BE AMONG THE FIRST TO ENJOY THE INNOVATIONS

We invest heavily in product development, and our Maintenance customers are always the first to benefit from these investments. The Maintenance plan lets you focus on running your business and producing excellent design.

HOW TO ACQUIRE A MAINTENANCE PLAN?

- Order a Maintenance plan with the upgrade or purchase of a new license
- A Maintenance plan can be signed for one, two or three years at a time, with discounts for two-year and three-year plans
- Contact your MagiCAD partner for an offer!

ABOUT PROGMAN

Progman specialises in software and services for the building industry. Our popular MagiCAD software, for Revit and AutoCAD, is the number one Building Information Modelling (BIM) solution for Mechanical, Electrical and Piping design in the Nordics, Russia and China with over 20,000 licenses sold in 56 countries. In addition, our online BIM library, MagiCloud enables access to

over 1,000,000 manufacturer-verified products from more than 200 globally renowned manufacturers. Each product is complete with accurate dimensions and comprehensive technical data.

With more than 30 years of experience in the industry, our team of more than 100 passionate software professionals continues to provide our customers

with intelligent solutions that make daily engineering and design easier, faster and more profitable. Progman is a Glodon Group company.
